

Can you spot
the difference?

SPECTRALIS
4D  **HD** TruTrack™
EYE HEALTH CHECK

We can see the smallest change . . .
and that changes everything

We can.

One in two patients with glaucoma don't know they have the disease.

Glaucoma is a hereditary disease that is often called 'the thief of sight' and left untreated can cause blindness. 50% of patients with advanced glaucoma are unaware they have the condition.

Earlier detection of glaucoma allows for earlier treatment and a better outcome for you.

With the SPECTRALIS 4D HD eye health check we see the smallest change before you do and that changes everything.

Protect your future, book your appointment today.
