

Can you spot
the difference?

SPECTRALIS
4D  **HD** TruTrack
EYE HEALTH CHECK

We can see the smallest change . . .
and that changes everything

We can.

One in two cases of serious sight loss is caused by age-related macular degeneration (AMD).

AMD can rob you of your central sight. Once this is affected simple activities like driving, watching TV and even recognising faces becomes impossible.

Earlier detection of AMD allows for earlier treatment and a better outcome for you.

With the SPECTRALIS 4D HD eye health check we see the smallest change before you do and that changes everything.

Protect your future, book your appointment today.
